

US insurance using EPAS for security and regulatory compliance

Firm size: \$10B

“ Throughout Tool For Password Remediation
With A Top-Notch Support Team ”

“ The biggest thing is that the support team is top notch and has provided fixes faster than any company I've dealt with in the past. Don't be afraid to ask questions. The support team is very knowledgeable about a wide range of systems. ”

Senior Manager, Security Analyst

OVERVIEW

The customer needed to meet a variety of requirements in a highly regulated environment, as well as improve cyber resilience by strengthening authentication.

SOLUTION

EPAS: “Very Powerful/Well Once learned, the product is very simple to use, and new scans can be configured within minutes. It can scan a wide variety of different OS/Systems including mainframe. The password scan reports provide all the information needed to close one of the easiest, but most dangerous security gaps. The tool had a higher-level overview report that can be used to provide evidence that your organization complies with any State and federal regulatory agencies that you may report too.”

CONCLUSION

“Vendor provides excellent and well produced documentation on how the appliance works, the setup process, and configuration of scans. The Appliance is rock solid and has been running password scans in our environment nonstop for 5 years without any downtime or failure.”
