

German bank using EPAS for security and regulatory compliance

Firm size: \$250M

“ Easy Installation / Maximum Benefit For Password-Quality ”

“ By using EPAS, we were able for the first time to fully measure the actual password quality and significantly improve it as part of an awareness program ”

CISO

OVERVIEW

The customer needed to meet compliance requirements, to improve cyber resilience by strengthening authentication, as well as improve awareness training.

SOLUTION

EPAS has been running without interruption since 2016, ensuring that passwords are secure and providing regulatory evidence in this respect. Quoting the project owner, “First approved and certified solution for the automated quality analysis of passwords in the company, which can be installed and operated without any problems, and which also complies with data protection regulations (no problems with works council & Co.).”

CONCLUSION

“Very good service from vendor especially in context of feature request and improvements top hardware support (got new hardware without request by reason of hardware improvements).”
